Acknowledgement

Receipt is acknowledged of the Amendment filed May 10, 2005.

Reasons for Allowance

Claims 1 and 3-27 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Carmichael et al., taken alone or in combination of other references, does not teach or fairly suggest a method or PLD configured to implement a circuit having reduced sensitivity to single event upsets comprising, among other things, a step of comparing the input probability of the plurality of inputs to the threshold probability to identify at least one single event upset sensitive gate (claim 1); each single event upset sensitive gate identified by comparing the input probabilities of the gate against a threshold probability (claim 25); and a step of assigning a logic value to each of the plurality of inputs and the plurality of primary inputs, wherein a dominant logic value is assigned to the input if the input probability is greater than the threshold probability and a non-dominant logic value is assigned to the input if the input probability is less than the threshold probability (claim 27), as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
